

## **Aurora Lamp™**

Congratulations on your purchase of the Aurora Lamp™

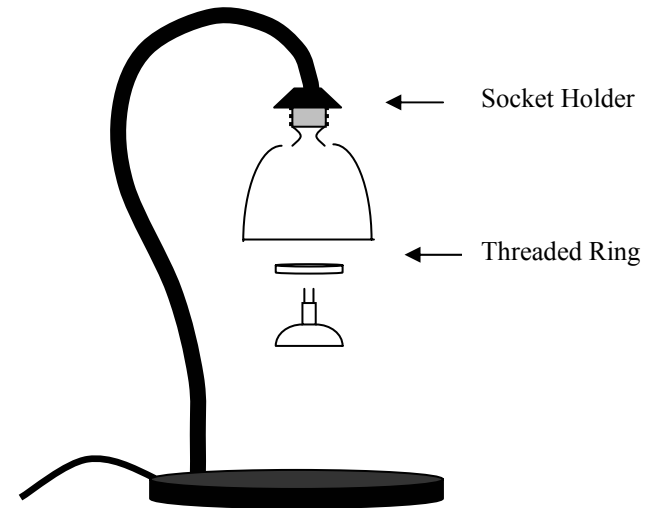

You can now safely enjoy your scented jar candle without having to burn it! To use your Aurora Lamp™, please take a minute to follow these simple directions and recommendations:

- 1- Place the Aurora Lamp™ on a flat surface
- 2- If using a regular jar candle, please trim the candle wick to keep anyone from burning it while (or after) using the candle with the Aurora Lamp™. Center your jar candle on the base of the Aurora Lamp™
- 3- Turn-on the Aurora Lamp™, depending on the size and softness of the candle, it will take several (5-15) minutes for the wax to melt and start releasing its fragrance
- 4- The melted wax will release its aroma for several hours (with lamp on). Once the scent runs out, carefully pour out some of the melted wax and place the candle back on the Aurora Lamp™. Additional wax will melt and release its scent. Repeat as necessary. Alternatively, add your favorite scented oil to the melted wax to replenish the aroma

### **Recommendations:**

- The NP2 light bulb included with the Aurora Lamp™ is specially designed to be used with jar candles (3" minimum height).
- Allow 1/2" space between the lip of the jar and the lamp shade
- If wax spills onto the Aurora Lamp™, turn the lamp off, let it cool for a few minutes and then remove the wax
- We recommend using a good quality scented candle. Some manufacturers use minimal fragrance in their candles
- The NP2 light bulb must be used to melt your candle. Also, please note that the Aurora Lamp™ will not melt some clear gel candles

## **Assembly Instructions**

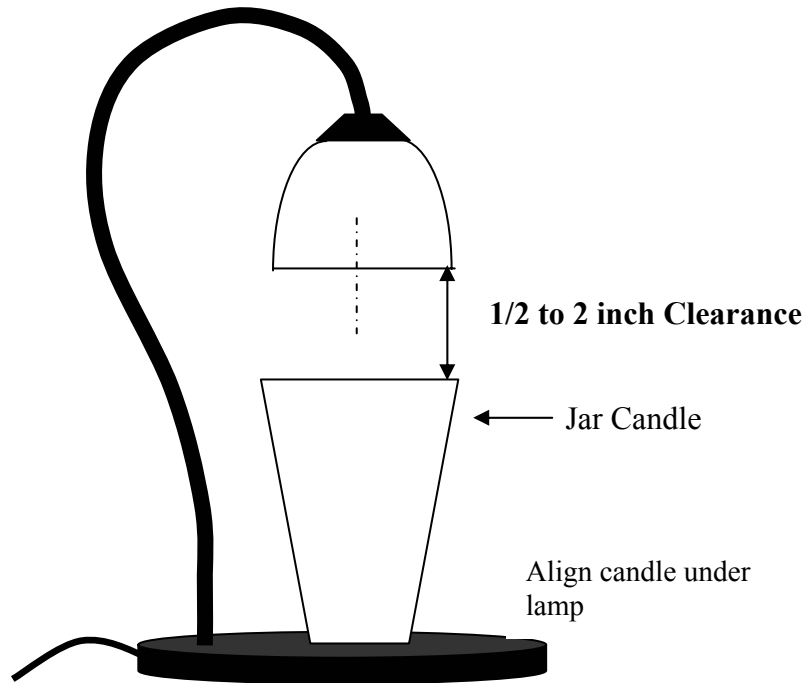

1. Remove shade holder ring from socket holder (*Note that the shade holder ring comes hand-tightened on the socket*)
2. Place shade around socket holder
3. Re-place ring on socket holder and hand-tighten
4. **Carefully** align light bulb prongs with socket and **gently** insert light bulb into socket
5. Please wipe lens with a clean dry cloth after handling

### **Caution:**

- **Use only as directed**
- **Burning a Candle on the Aurora Lamp™ will void the warranty, damage the lamp and cause a risk of FIRE**
- **The lamp and the melted wax get HOT quickly, do not move lamp while powered, or while wax is melted**
- **Always unplug power before handling light bulb. Use Novapro WarmLight™ NP2 20 Watt light bulb**
- **The light bulb gets HOT quickly, allow it to cool before handling**

**Directions:**

**Limited 90 Days Warranty**

Novapro warrants this lamp against defects in materials or workmanship for a period of 90 days from original purchase.
